A NEW VISION OF ELEVATION

MP GLASS lift

Panoramic lifts

Aesthetics and functionality

In our MP GLASS line of elevators **functionality and design are perfectly combined to result in breathtaking vistas** from any viewpoint. The MP GLASS lift is a new perspective on elevation. Intelligence, more attractive than ever.

MP GLASS lifts are another example of the **innovation, flexibility and customer service** that have made us **sector leaders** worldwide. Our company philosophy is supported by its enormous **international experience**, typified by our flagship creations found worldwide. All are practical and efficient solutions that today continue to represent satisfied customers.

OPEN YOURSELF
TO A WORLD OF
SATISFACTION

CUSTOMISATION

Projects tailored to your imagination

Specificity in design and service.

All MP GLASS lift products share qualities that ensure each is a **cut above**. Our dedication to excellence doesn't end there as each lift is tailored to the specific requirements of each project. The evidence for our success is the **large number of projects carried out worldwide**, each of which MP oversees from the initial phases right through to after-sale maintenance.

CONCEPT

Close cooperation with the architect. During the initial phase, the architect provides the ideas and then the specifications required for the implementation of the chosen design. These can be rendered in 3D to offer a clear model of the final product.

PROJECT

From planning to manufacturing. The development of the project is carried out with a particular care for the integration between lift and building. Our monitoring of all phases of manufacture ensures high quality in both aesthetics and operation.

TRANSPORT

Specialized transport. The transport from our factory to destination is carried out by specially trained personnel.

INSTALLATION AND COMMISSIONING

“Turnkey” projects. The process ends with the installation and commissioning of the lift. Our service goes beyond: we provide maintenance for the entire lifetime of the lift.

FREEDOM OF ADAPTATION

Standard cars: unique versatility

MP GLASS lift line has been created to offer the best solutions for any possible situation. Besides complete customisation, we offer a number of standard models designed to provide **additional value** to our glass lifts' **performance and aesthetics**.

Your specific needs will guide your choice from among the many options available, each designed to integrate into your environment, making it fashionable and functional.

COMMON FEATURES for all the panoramic models.

Functionality

All MP products are outstanding examples of functionality and the **MP GLASS lift is no exception**. The beauty of our models does not affect reliability, safety or comfort: On the contrary, it makes them yet more of a pleasure to use. Although, for once, you can enjoy more just by looking.
